Profile

I hold a bachelor's degree in Computer Science. I have designed WordPress websites and worked on a team developing AI tools. Now I am a Customer Representative at Let's Coffee, where I am learning the day-to-day operations of a business—from customer relationships to invoice processing, inventory tracking, and product management.

Experience

Let's Coffee — Customer Representative | May 2026 – Present

Alongside customer communication, I am learning the daily operations of both the café and the store. I have taken part in invoice processing, inventory tracking, and product management on both sides. During the setup of a new shop, I contributed to the renovation process and helped with fixture and equipment purchasing.

Doğruöz Bilişim · Antalya — Web Designer | December 2025 – April 2026

I handled the design, implementation, and maintenance of WordPress websites. I made customizations using PHP and CSS, prepared site copy and visuals, and carried out SEO work to improve search visibility.

Morfeu.ai · Remote — Software Developer | January 2026 – March 2026

I contributed to the development of AI-agent-based tools and bots focused on agent security. I researched agent architectures and migrating existing systems from Python to Go, and worked on autonomous agent prototypes.

Neyasis Technology · Remote — Intern | July 2023 – October 2023

Working in an agile team, I used C# to develop ChatGPT API integrations and build prototypes for enterprise .NET applications.

How I Can Help

Web Design & Content

I can take a WordPress site from design to launch, customize it with PHP and CSS, prepare and edit its copy and visuals, and handle foundational SEO work.

Software & Prototyping

I built ChatGPT API integration prototypes using C# and .NET. I also researched AI agents and contributed to prototyping work.

Customer Communication & Operations

I communicate directly with customers and am building hands-on experience in invoice processing, inventory tracking, and product management across both café and retail sides.

Education

Alanya University

B.Sc. in Computer Science

2019–2024 · GPA: 3.06

Projects

Maze 3D

I developed a first-person 3D maze game using Unity and C#. I worked on player movement, core game physics, and scene design.
